Continuation of Disposition of Claims: Claims pending in the application are 1,2,47-8, 12-16, 19, 24, 27, 29 30,-31, 38, 41-42, 45-47, 49, 51-52, 59, 64, 164 .

DETAILED ACTION

The applicant's response filed 04/28/2009 stated that the combination of dependant claims 4 and 7 in the rejection stated does not meet the requirements set forth in claim 6. This argument is persuasive as shown by the referenced patent application 2003/0207173. Since the applicant has brought the issue of multiple embodiments wherein the dependant claims are not usable together, a restriction of the dependant claims is further required so that only one embodiment that negates all non-usable together embodiments is reviewed.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1, 2, 16, 19, 46, 47, 59, drawn to a cell with a discharge capacity that exceeds the discharge capacity of the sole 1st active material.

Group 2, claim(s) 1, 4, 46, 49, drawn to a cathode with a MnO₂ first active layer.

Group 3, claim(s) 1, 7, 8, 12-15, 46, 51-52, 56, drawn to an extender with copper.

Group 4, claim(s) 1, 24, 46, 64, 164 drawn to an anode with a specific internal volume ratio of .5Ah/cc.

Group 5, claim(s) 1, 2, 29-31, 38, 42, 46, drawn to an extender layer that exists connected to the cathode.

Art Unit: 1795

Group 6, claim(s) 1, 41, 46, drawn to Primary active material is an oxide and hydroxide of nickel, lead, or silver.

Group 7, claim(s) 1, 45, 46, drawn to a cell that is alkaline.

2. The inventions listed as Groups 1-7 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common inventive idea of claim 1 and 46 are found in Barker et al (PGPUB 2004/0197654) wherein the various combinations presented [Paragraph 71-421].

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

Art Unit: 1795

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
